Necmettin Karakaya

Guangzhou, Guangdong, Çin +86 186 6452 18 50 necmettin.karakaya@gmail.com http://necmttn.github.io

> This is Necmettin Self-Taught Software Engineer. A community leader for Software Developers in Guangzhou. Instructor in Code Up Girl
>
> When it comes to actual development, I choose to write compact, isolated code. Ubiquitous well-written tests are what makes me sleep like a rock, my clients feel in good hands and safe. That's why I put tests at the top of my priority list. The role of tests becomes crucial in the world of JavaScript. The language with its long curved path of evolution, is far from being free of quirks. Some are just obviousness and others are totally bizarre.
>
> To keep the grade of monkey business low and productivity high, I follow the best practices, use patterns where appropriate, learn new techniques and demand myself and other team members deliver quality code which conforms to the high industry standards.
>
> - Node.js (loopback, express, Koa, and most npm libraries)
> - JavaScript (React/Redux, Vue, Jest)
> - ElectronJs
> - Docker (Dockerfiles, docker-compose, Kubernetes, Mesos)
> - Golang
> - Elasticsearch
> - MongoDB
> - Redis
> - MySQL
> - Socket.io
> - CSS3, SASS, Styled-Components
> - HTML5, PUG

Technical Skills

Likes: javascript reactjs redux go vue.js electron webpack

Experience

Full-Stack Developer – Kiwi inc co.   *Nov 2016 → Jan 2018*
javascript, vue.js, electron, redux, vuex, docker, docker-compose, electronjs, reactjs, nextjs, gitlab, continuous-integration

Education

Computer Science – Guangzhou University   *Sep 2017 → Current*
After dropout from architecture, I needed to continue being the student in order to continue my life in China. (visa issues)

Architecture – Guangzhou University   *Sep 2015 → Sep 2017*
I started studying Architecture having a mindset where I wanted to learn more about Creative Art with robotics & architecture. but eventually, i just become a software developer. then i drop out.

Projects & Interests

Necmttn/necmttn.github.io – https://github.com/Necmttn/necmttn.github.io   *Oct 2017 → Current*
Personal website

Necmttn/gatsby-plugin-i18n – https://github.com/Necmttn/gatsby-plugin-i18n   *Oct 2017 → Dec 2017*
Multi language routes for Gatsby

Necmttn/gatsby-source-trello – https://github.com/Necmttn/gatsby-source-trello   *Oct 2017 → Oct 2017*
Necmttn/taskQueforPython – https://github.com/Necmttn/taskQueforPython   *Jun 2017 → Jun 2017*
task Que for python with redis.

Necmttn/CodeUpGirlBot – https://github.com/Necmttn/CodeUpGirlBot   *Jun 2017 → Jun 2017*
Python Scrapper for collection users score, and publishes using slackbot

Necmttn/filedata – https://github.com/Necmttn/filedata   *Mar 2017 → Mar 2017*
terminal CLI for get FileData in JSON String Format

Apps & Software

Mesh - Electron Desktop App – http://meshtech.co/   *Jan 2018*
electron, vue.js, vuex, webpack, continuous-integration, cd, sass, css-modules
Mesh Mobile app required post production solution. I have created a quick prototype base on electron as post production tool. For Front-end it's uses the Common Vue component library we have created in Mesh. For backend it's backed up with Node.js Koa base backend.

mesh-envoy library – https://www.npmjs.com/package/mesh-envoy   *Nov 2017*
lerna, rollupjs, javascript
Internal library for comunication between JS and Swift code.

Mesh Lite website – http://meshlite.meshtech.co/   *Nov 2017*
next, reactjs, redux, styled-components
White Mobile IOS App – http://liubaiapp.com/   *Jan 2017*
reactjs, react-native, react-router, react-animated, javascript
Ding Apperaels – http://www.dingapperaels.com/   *Jan 2016*
wordpress, html, css, javascript
Chayhana Turkish Restaurant - website – http://www.chayhanaturkishrestaurant.com/   *Jan 2016*
gatsby, reactjs, react-router, docker, css, progressive-web-apps
Karma Technic website – http://karmatechnic.com/   *Dec 2015*
javascript, php, html, css
